TO WHOM IT MAY CONCERN

NOKHWEZI EDUCARE CENTRE AND MASIGCINE CHILDREN'S HOME - MFULENI

The initiative was well organized and one could see that proper planning was done.

Everybody pulled their weight to make it a big success. Power Construction wanted to get involved in the community and this project suited our intention. Some of our workforce stays in the areas and some of their children also attend the Nokhwezi Educare Centre. The money spent on these projects amounted to approximately R70 000-00, but we also received lots of sponsorships from our suppliers in the civil industry.

The one big reason Power Construction entered into supporting this initiative was the fact that we realized that this is money well spent. One can see that both the projects we completed are still well looked after, maintained and managed, two years down the line.

This is a great initiative from NewKidz on the Block and where possible we would like to support them with similar projects in future.

Yours sincerely
POWER CONSTRUCTION (PTY) LTD

A handwritten signature in purple ink, appearing to read "AZ", is written over the company name.
